DETAILED ACTION

Response to Amendment

1. This Office action addresses claims 1-8, 10-29, and newly added claims 31-46. Claims 1, 5, 7, 8, 10-15, 18-24, 26, 28, 31, 32, 36, 36-42, and 45 are allowed and claims 2-4, 6, 16, 17, 25, 27, 29, 33-35 37, 43, 44, and 46 are newly rejected under 35 USC 112 first paragraph as necessitated by amendment. Accordingly, this action is made final.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2-4, 6, 16, 17, 25, 27, 29, 33-35 37, 43, 44, and 46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Each of the instant claims makes reference to “purified hydrogen” or a “PEM electrochemical cell.” However, independent claims 1, 22, 31, and 40 have been amended to recite that the system comprises a solid oxide fuel cell or functions to purify oxygen. It is submitted that the above-noted references to hydrogen are

inconsistent with respect to an oxygen purification system/method as now recited in the independent claims, and constitutes new matter into the application. Stated another way, the instant application does not adequately support an embodiment of the invention that is capable of simultaneously purifying hydrogen and oxygen, and similarly does not support an embodiment simultaneously comprising a solid oxide fuel cell and a PEM fuel cell. Correction is required.

With regard to independent claims 1, 22, 31, and 40, it is suggested that the claims be amended to remove the references to optionally purifying hydrogen, although as currently drafted, the claims are believed to have sufficient clarity such that a rejection under 35 USC 112 first or second paragraphs is not warranted.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1745

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
